

Summer 1899.

W.O., to J. George Adami.
15 Queen's Park,
Toronto.

Friday. July 1st 1898

Dear Adami: Yours of the 28th reached me here, where I have been for a week on the way to Bar Harbour with Mrs. Osler and Egerton Y. (Jr.). I am delighted to hear of the cirrhosis work. Do send the material etc. with Stewart. I shall be only too glad to read the paper and show the specimens. Have you notified the secretary of the Med. Section. The discussion on cirrhosis is in it - I think. It will be quite startling - but what a comfort to the thirsty Scotsmen!

Thanks for the congratulations upon the F.R.S. It was very unexpected, and very much appreciated. I have been in the depths - a revision of my text-book. I have knocked it to pieces. Sins of omission begin to haunt me - as the sections are printed off. I had a note about your interesting lipomata - and forgot it! I shall look out for the paper and specimens by Stewart.

Love to 'little Mary Cantlie'.

Sincerely yours,
Wm. Osler.

J.G.A. Refers to Edinburgh Meeting of B.M.A. where O. read for me a paper on the bacteriology of 'Postal cirrhosis'.

And again the next day -
